WHY SHOULD WE RECOMMEND BIFOCAL B-FREE?

No sudden image shift sensation when the gaze moves from distance to near.

Aesthetic lenses due to the reading segment being virtually unnoticeable

Easy and comfortable focusing, especially for the use of electronic devices

DIFFERENCE BETWEEN CONVENTIONAL BIFOCAL AND B-FREE:

Conventional Bifocal

Bifocal B-Free

BIFOCAL LENSES

BIFOCAL B-FREE

The B-Free bifocal lens eliminates the visible line between vision zones, ensuring a more natural visual experience, greater comfort, and a superior aesthetic appearance. It also removes the “image jump” sensation typically associated with this type of lens, which can be particularly disturbing, especially at the beginning.

To enhance visual comfort, these lenses can be fully customized according to each wearer’s individual characteristics..

RECOMMEND BIFOCAL B-FREE WITH:

NEOCHROMES® Embrace the light

Material that protects the eyes from harmful UV rays.

Protect Complete

Premium coating applied to the lens for easier maintenance and cleaning

B-Free bifocal lenses are available in a wide range of materials, including LEDPRO and polarized options.
