EasyFit

The easiest-to-adapt progressive lenses

EasyFit progressive lenses are an innovative solution for issues that may arise due to less precise marking, which can have a significant impact on visual quality.

This lens optimizes optical practice efficiency by reducing remakes and complaints, making it ideal for teams working under high order volumes or with staff in training.

Designed for easy adaptation and consistently reliable results, this lens is intelligently engineered to ensure high visual quality and rapid adaptation, thanks to extremely smooth optical transitions and an extended near vision zone.

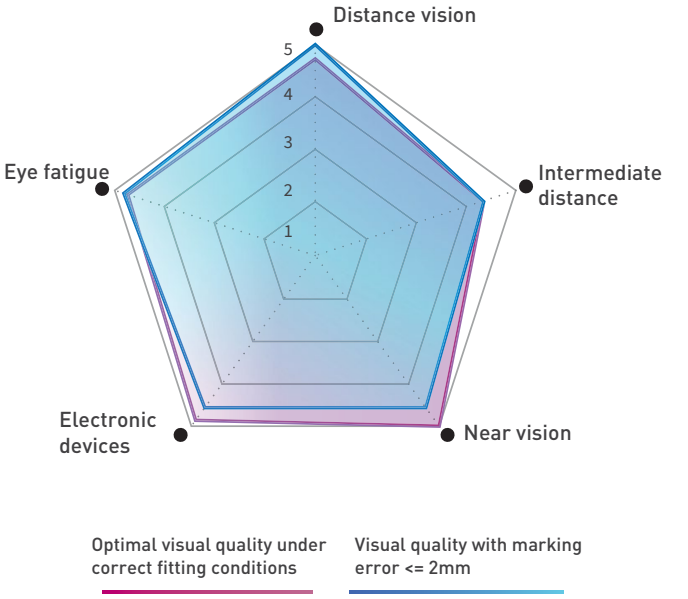

75% Among wearers, adaptation has occurred in just a few hours.

In clinical studies conducted on Attraction EasyFit progressive lenses, 75% of participants adapted to the lenses within a few hours.

Are you concerned about taking measurements?

EasyFit delivers **very good visual quality** even when marking **errors are up to 2 mm**.

A unique configuration that emphasizes the intermediate zone to minimize the unwanted effects of decentration. Near-vision power is strategically distributed to provide an extended near zone.

Designed and tested for modern digital life, the lens performance remains stable even when using digital devices.
