WHY RECOMMEND ADAPTIVE SPORT?

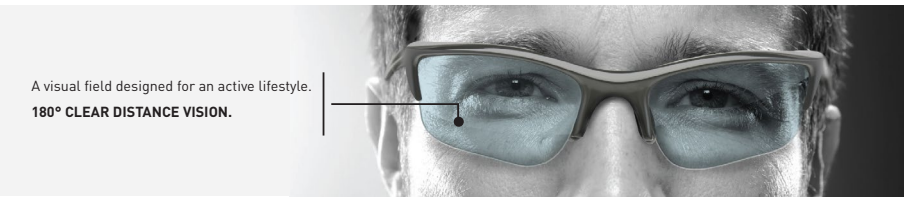

Specifically designed for active presbyopic wearers

Delivers outstanding performance during outdoor activities

Provides clear vision at all times, especially for distance vision

HD VISION FOR CURVED FRAMES

Sports frames with a high wrap angle require lenses optimized according to the frame parameters to compensate for oblique aberrations. Adaptive Sport lenses provide clear vision across all viewing zones, regardless of the frame curvature.

PROGRESSIVE LENSES

ADAPTIVE SPORT

Designed for active wearers, these progressive lenses feature an optimized distance vision zone without compromising intermediate and near vision. They are the ideal solution for sports, hiking, cycling, and other outdoor activities.

Thanks to Free-Form Technology, every lens is individually customized according to the wearer's prescription and frame parameters, ensuring outstanding visual stability, a natural viewing experience, and complete freedom of movement.

RECOMMEND ADAPTIVE SPORT WITH:

NuPolar® Polarized sun lenses

Protect Complete — Premium lens coating for complete UV protection

Adaptive Sport lenses are available in a wide range of materials, including NuPolar Mirror and Infinite Grey.
