Every profession comes with its own visual challenges. Adaptive TECH provides visual comfort tailored to the way you work—even when your tasks require looking above eye level!

PROGRESSIVE LENSES
ADAPTIVE TECH

WHAT ARE ADAPTIVE TECH LENSES?

Adaptive TECH lenses are progressive lenses specifically designed for people who frequently perform near-vision tasks above eye level.

Their innovative design incorporates an additional near vision zone in the upper part of the lens, providing enhanced visual comfort and promoting a more natural, ergonomic working posture during professional activities or hobbies.

BENEFITS:

- Two near vision zones
- A more natural working posture
- Ideal for electricians, pilots, automotive mechanics, technicians, etc.
- Available in a wide range of materials and lens coatings

Choose ADAPTIVE TECH with:

Protect Complete Complete UV protection

Adaptive TECH lenses feature an additional upper near vision zone, making overhead tasks more comfortable and efficient.
