Because your eyes can't avoid LED light, LED PRO lens material intelligently manages it, providing greater visual comfort and reducing eye fatigue throughout your day!

MATERIAL

LED PRO

WHAT IS LED PRO MATERIAL?

LED PRO is the first patented ophthalmic lens material engineered to deliver advanced optical performance and superior visual comfort for everyday exposure to LED lighting.

LED light is part of our daily lives, but prolonged exposure can lead to visual discomfort and eye fatigue. LED PRO is designed to enhance visual comfort and provide a more pleasant viewing experience in environments illuminated by LED light.

BENEFITS:

- All-day visual comfort in LED-lit environments
- Compatible with a wide range of lens designs
- Thinner, more aesthetic lenses
- Enhanced comfort for night driving

Choose LED PRO with:

Attraction **EasyFit**

Progressive lenses for clear vision at all distances

LED PRO lenses have a subtle greenish tint but come with no limitations on everyday use.
